We collect and use only the finest, ethically wildcrafted ingredients (collected by ourselves). This includes a wide range of unusual and hard-to-locate plants (yes, mushrooms are plants, too) and, never collect more than we anticipate we will need for ourselves, for market, membership, reserve and for gifting. Therefore, we limit the number of memberships we will accept and keep only a very limited supply on hand from season to season. **Due to the success last year's local pickup program, we are pleased to be able to offer five (5) new memberships .** Please contact us directly to check for availability. We look forward to collecting and sharing with you! Nova Kim and Les Hook
